

Kenya's Cloud & Connectivity Hub

PAIX carrier-and-cloud neutral data centre in Nairobi ("NBO1") provides a secure and scalable infrastructure for mission-critical IT systems, with ample power capacity and a wide range of connectivity solutions.

Located at Britam Tower in the central business district of Upper Hill, the financial and administrative centre of East Africa, the facility is surrounded by financial institutions and multinationals. The facility is built to world class standards with redundant UPS, power generation and cooling systems.

Connect, transact, and grow your business at PAIX Data Centres.
